Interventional Radiology (IR) Nurse

Job Description Template

Looking to take your nursing career to the next level? At *[insert facility name here]*, we're interested in growing our nursing team. We're looking to hire an experienced interventional radiology (IR) nurse to assist with outpatient surgeries in our medical procedures unit (MPU).

When you work at *[insert facility name here]*, you'll become a part of our robust surgical multidisciplinary team. Our nurses are involved in the preoperative, intraoperative, and post-surgical recovery phases of each patient's stay. We pride ourselves on our ability to walk patients through difficult health journeys and to help those we care for to feel more at home.

Interventional radiology nurses help serve our mission by collaborating and communicating with surgeons, attending physicians, assistive staff, and patients to develop a plan of care that optimizes patient wellbeing. They're involved with every step in the diagnostic process and provide specialized recovery care to help patients get home safer and happier.

Learn about our excellent benefits, compensation, and scheduling flexibility below and apply to join our team. We can't wait to hear from you!

Benefits

- Competitive pay
- $20,000 sign-on bonus after 18-month contract
- Health, dental, and vision benefits
- FSA/HSA options
- Access to state pension program and 401(k) matching
- Paid vacation/holiday/family leave
- Free continuing education (CE) courses
- Subsidized public transportation
- Free gym membership (variety of options available) for duration of employment
- Tuition reimbursement of up to $5,000 per year

Duties and Responsibilities

Interventional radiology nurse duties include, but are not limited to, the following:

- Inserting, maintaining, and removing intravenous lines for safe medication and contrast dye delivery
- Reviewing allergies, patient history, and physical assessment findings with the patient and medical team prior to surgery
- Educating patients and family members on post-operative plans and procedures
- Assisting surgeons during neurological and vascular angiography (setting up supplies, passing guide wires and catheters, preparing sterile trays and equipment, handing over instruments and supplies, etc.)
- Monitoring for and addressing intraoperative complications (oversedation, cardiac arrhythmia, respiratory decompensation, acid/base imbalance, etc.)

Compensation and Shifts

- Starting salary of $80,000, with adjustments subject to education level and relevant leadership experience
- Overtime, on-call, holiday, and incentive pay available
- 6-week orientation period working Monday through Friday for 8-hour shifts (8a-4p)
- Three scheduled 12-hour shifts (7a-7p) per week after successful completion of orientation
- Weekend day/night on-call shifts required (two shifts per month required, with available opportunities for more at the employee's request)
- Bi-weekly or weekly pay periods

Qualifications and Skills

Required Qualifications:

- Active and unencumbered RN license
- BSN required, MSN preferred
- BLS, ACLS, and PALS certified
- 2 years of experience working in intensive care, operating room, or interventional radiology role
- Experience documenting electronic health record (EHR) data
- Excellent interpersonal communication skills
- Complete and pass facility-required "IR nursing basics" examination upon hire

Preferred Qualifications:

- Radiology Nurse (CRN), Perioperative Nurse (CNOR), or Critical Care Nurse (CCRN) Certification
- 8+ years of nursing experience at a Level I trauma center
- Impeccable organization, time management, and critical-thinking skills
- Bilingual in English and Spanish
