

Nurse Practitioner

Recommendation Letter Template

To Whom It May Concern,

My name is *[your name]*, and I am writing this letter of recommendation on behalf of Evelyn Sims, whom I have had the pleasure of working with for the last four years. As a clinical nurse manager at University Hospital, I have supervised and mentored Evelyn during her time as a nurse practitioner in our cardiology unit.

Over the last four years, I have watched Evelyn grow as a clinician, developing essential teamwork, collaboration, and critical thinking skills. Her passion, work ethic, and ability to unite her team toward common goals make her an ideal NP for any organization.

As a new graduate nurse practitioner, Evelyn demonstrated strong critical thinking skills learned during her eight years as a bedside ICU nurse. She was excited to learn new skills like removing pleural chest tubes, inserting central line catheters, and performing cardioversions at the bedside and was always willing to ask for help when she wasn't confident in performing a particular procedure.

Now, having worked in our unit for four years as an NP, she still shows curiosity and passion toward improving her professional practice. She has since become a certified medical interpreter to help our patients receive the high-quality care they deserve, regardless of their cultural background or primary language. Evelyn takes every opportunity to mentor nurse practitioner students and new graduates, showing patience, compassion, and attentiveness to all who come to learn on our unit.

Evelyn's team members appreciate her collaborative and creative approach to clinical care and describe her as honest, tenacious, and passionate about improving the lives of those she serves. Last year, she was honored with a Daisy Award for her research on minimizing postoperative pain in orthopedic patients. This year, she has been nominated as one of University Hospital's Providers of the Year award for reducing the incidence of catheter-associated urinary tract infections (CAUTIs) from 5.6/1000 catheter days to 2.1/1000 catheter days.

For these reasons, I believe Evelyn would make an incredible addition to your nursing team. Her strong clinical skills and tenacity for improving patient care make her the perfect candidate for your organization. It is with great honor that I recommend her for the cardiac nurse practitioner position.

Feel free to reach out with any additional questions. I would be happy to further discuss Evelyn's skill and abilities. I look forward to hearing from you.

Best regards,
