Telemetry Nurse

Job Description Template

We're seeking experienced RNs to work on the cardiac telemetry unit located in the Heart Center at one of the region's top medical facilities. Come join a team of motivated and innovative medical professionals improving lives in our community.

Our telemetry nurses are responsible for delivering high-quality nursing care to patients with various cardiovascular conditions and surgical needs. The RN follows the nursing process to ensure the plan of care is delivered safely and effectively. This is done in accordance with the Nurse Practice Act, hospital policy, and provider orders.

Applicants with non-cardiac backgrounds are encouraged to apply. Our cardiology nursing education department provides initial training and extensive continuing education to elevate your career as a Heart Center nurse.

Benefits

- Retirement matching
- Health, vision, and dental insurance
- Paid time off (PTO)
- Employee wellbeing program
