Virtual Nurse

Job Description Template

A virtual registered nurse (RN) is responsible for remote patient management and care in the inpatient setting. As a member of the patient care team, the RN collaborates, communicates, and facilitates care with providers and patients or families. Virtual nurses maintain patient anonymity and safety through the use of various technological platforms. To be successful in the role, a nurse should be comfortable making autonomous clinical decisions to provide patient-centered care. Experience working with EHR systems is required.

Benefits

- Competitive pay
- 401(k) matching
- Paid time off (PTO)
- Free continuing education courses
- Health, vision, and dental benefits
- Mental health coverage

Duties and Responsibilities

- Communicating with patients and other healthcare providers via video conferencing technology, including desktop computers, mobile devices, tablets, and smartphones
- Planning, assessing, implementing, and evaluating a patient's care plan
- Performing admission intake, patient education, and discharge teaching
- Collaborating with the interdisciplinary team to provide goal-directed care
- Utilizing clinical decision-making to escalate concerns to the care team
- Documenting patient interactions using the EHR system
- Providing virtual education about a patient's diagnosis, test results, and treatment plan
- Providing telephonic counseling

Compensation and Shifts

- Day/night rotating, every other weekend
- 12-hour shifts (8a-8p/ 8p-8a)

- Hourly rates starting at $40/hr
- Night and weekend differential
- Remote work
- Opportunities to become charge nurse after 6 months

Qualifications and Skills

- Bachelor of Science in Nursing (BSN) required
- Compact nursing license
- Minimum 5 years of RN experience in an acute care hospital
- Med-surg or oncology experience preferred
- Experience caring for medically complex patients
- Ability to demonstrate independent clinical decision-making
- Strong communication skills, both verbal and written
- Bilingual (Spanish) a plus
- Proficient EHR technology (Epic preferred), Microsoft, and GE monitoring
- Strong understanding of HIPAA and data security on telehealth platforms
